COURSE INFORMATION

Course Description: A survey of the branches of psychology and the scientific approach to the study of behavior. Given the importance, complexity, and variability of the brain, mind, and society, we be touching on a very wide range of topics, from the workings of individual brain cells to the way our minds process information, the variety of mental illnesses, and the nature of our social interactions. It is hoped that this material will help deepen your understanding and appreciation of other courses you will take at UT, from biology and sociology to history and philosophy.

Student Learning Outcomes: This course fulfills a General Education and Core Curriculum requirement at the University of Toledo.

Prerequisites and Corequisites: None
