

Course Syllabus PSY 2510003 Lifespan Development (CRN26787) Spring Semester 2014

Exams:

Exams will be given on the dates listed in the course calendar unless othemaentsgare made. Exams will be taken onlinevia Blackboardon the days assigned here will be no class on exam days.

Exams will consist of 40 multiple hoice questions, each worth 1 pointed 2 short answers, each worth 5 points Beware that some multiple

- (1) You will raise a virtual child from ibth through age 18.
- (2) You will make decisions for your virtual self from age 18 through late adulthood.

These simulations will take you through a series of events and questions to which you will respond. Some events will depend on your responses tqueetions; while others are selected as part of the program and do not necessarily depend on your responses.

You will be responsible for 4 writing assignments in addition to the simulations, which are described in detail at the end of the syllabus.

Att endance & Participation:

You will not be graded on your attendance. Howevermes will cover material found in both the text andcourse activitiesLectureswill be posted on Blackboarate designed to review the main sections of the textbook and to expansion a sample of the concepts coverethertext. New material that parallels and/or supplements the textbook will be introduced ducinages For this reason, attending and participating in class will improve your understanding of the text and thisecasts whole. If you do not feel comfortable asking questions duringss I encourage you to stop by during office hours to discuss or send me an email.
