will come from the creativity to fix the problem. It is possible that there will be limits to your expertise on the subject – this is okay! You must be willing to point this out and discuss how you could find more information on the topic. Team projects are worth 20% of your grade – there is a rating component as well so you can point out if someone is being a lump on a log – DON'T BE A LUMP ON A LOG! These activities are more fun if everyone is participating!!! If you are being a lump on a log and not helping your group, I reserve the right to give you a zero on the assignment, even if your group grade is higher. Team projects may not be made up unless you have a university

**Late exams** are not

**Course Grading Breakdown:**

<b>Breakdown</b>	<b>Percentage*</b>
Homeworks (10 or so)	10
