QUIZZES: The quizzes are for you to test yourself and are machine scored. This means that correct answers may be scored wrong due to spelling or alternative correct answers. Don't Panic! The quizzes DO NOT COUNT towards your grade. They are for self-test and practice. You can take them again.

(

IMPORTANT NOTES:

1. The exams use different questions than the quizzes. You need to understand concepts as memorizing answers to questions will not suffice. Each exam has 25 questions (plus a 26th in which you type your name).

2. Each successive exam will contain some review questions from previous sections--the book also contains review questions as you go along. This means you have to remember what you learned in one section and apply to subsequent sections. (For this reason, there is no Final

68% = C-, 66% = D+, 60% = D, 57% = D-, >57% = F.

IMPORTANT STUDY TIP

The 4th edition of this book contains an access code that you can use to log on to a website where you can get additional information about the concepts covered in this book. However, it is not required for this course.

Quizzes

:

Chapter Ouizzes are provided for practice for each Lesson and do not

count towards your grade. (These are the quizzes in the back of your textbook.) You should use the quizzes to check yourself **after** reading a chapter. They are there for you to check your mastery of the chapter -- the exams will use different questions.

The quizzes are machine-scored so spelling errors are counted as wrong answers. Also, there may be an alternative correct answer that is not listed. **Do not panic if the computer scores an answer on a quiz wrong when it is really correct.** Henry.Heffner@utoledo.edu

Course Evaluation

í

1

1

As with all UT courses, students will be able to fill out a course evaluation.

which is anonymous.
